

## MUL-9

9 m ultra light manportable sectional mast kit, 1 m sections

### Tactical Masts: Sectional Manportable

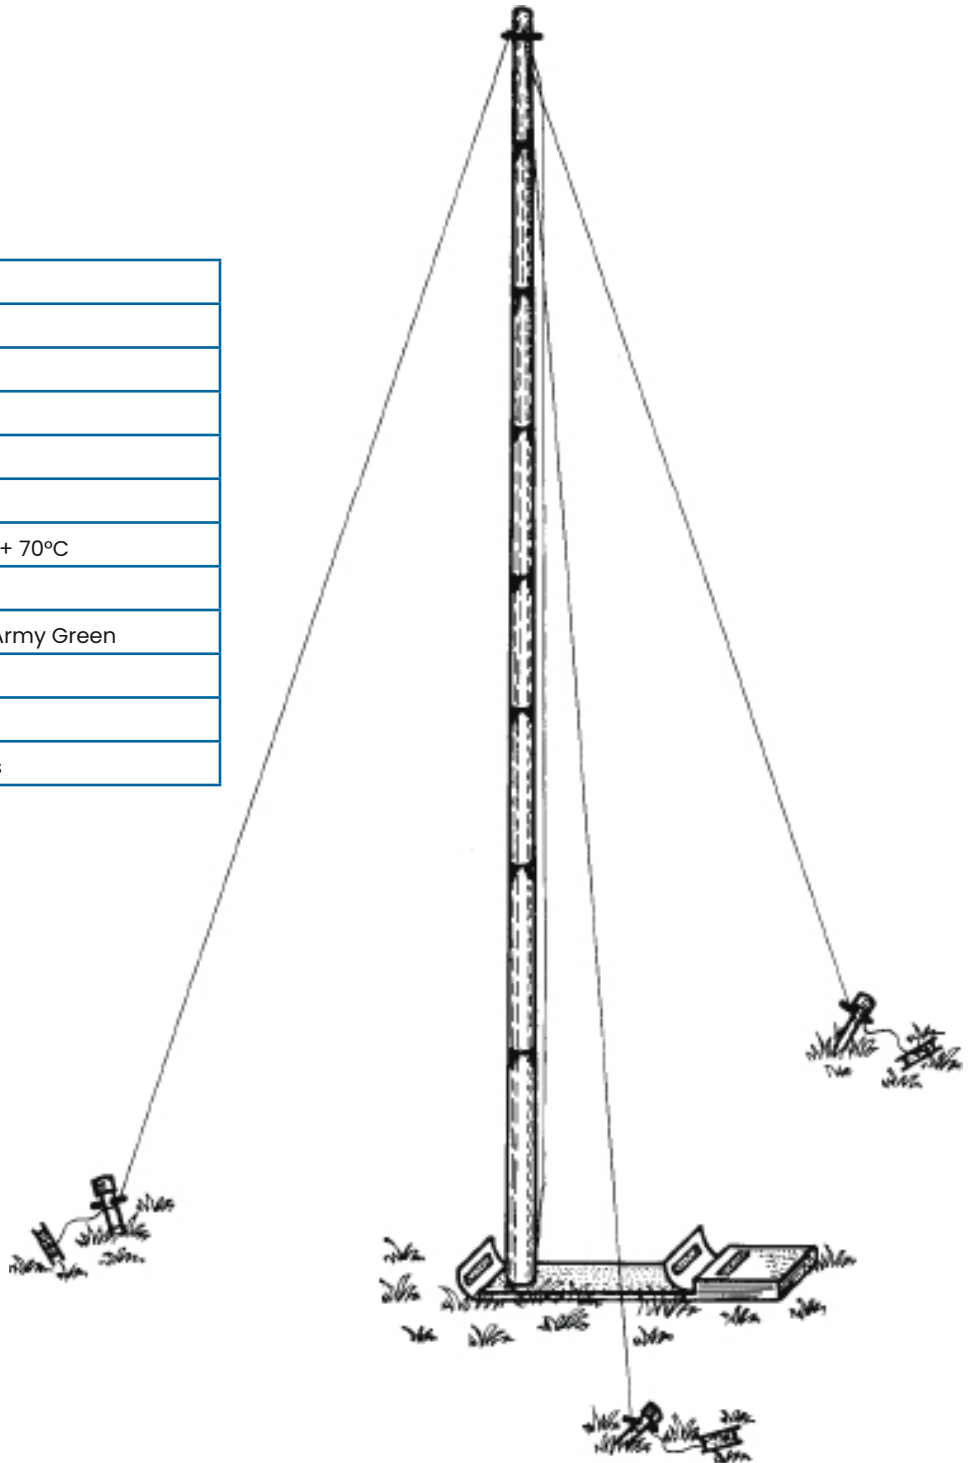

The MUL 9.0-1.0 is an ultralight mast with a very short deployment time. This feature is particularly appreciated by Airborne Units.

This mast has been designed to support a light wire antenna or a very light omnidirectional antenna, which makes instant radio connections possible in any area.

The lifting system is identical to the very popular Comrod fishing rods: all tubes (conical) are stored in the bigger one, they are extracted from the bigger tube at the bottom and sleeved one into the other.

### Technical Specifications

<b>Height</b>	9 m
<b>Tip Diameter</b>	22.5 mm
