

Tie-Down-36

Tie-Down, for 36 mm diameter antenna elements, 2 m rope
Tactical Antennas: Vehicle Mount

Technical Description

The tie-down kit is used to lower Comrod antennas during deployment or when a lower visual profile is required. The kit is comprised of a neoprene retaining loop with 2 m of rope. The tie-down loop is placed over the antenna element and rope tied to a suitable point on the vehicle. The self locking loop ensures the antenna element is held firmly in place.
